Summary

I am an aspiring Full Stack Web Developer with a strong foundation in frontend technologies, including HTML, CSS, JavaScript, and React. I have completed my frontend learning and am currently building my skills in backend development to create complete and efficient web applications. I aim to apply my growing technical expertise to real-world projects and build scalable, user-focused solutions.

Education

B.E. in Dept. of ISE, Vidyavardhaka College of Engineering
Class 12th, Karnataka Board of the Pre-University Education
Class 10th, Karnataka Secondary Education Examination Board

Skills

Frontend: HTML, CSS, JavaScript, React

Backend (Learning): Node.js, Express.js, APIs

Projects

ShareCircle – Donation Platform

Developed the frontend of a donation platform where users can list unused items, add them to the cart, and request items. Built responsive and user-friendly UI screens, integrated frontend with backend APIs, and implemented smooth navigation and workflows for listing and cart management. The application's frontend was developed using React and deployed on Render.

FreshCart – E-Commerce Platform

Created a web application for farmers using HTML, CSS, and JavaScript, with XML used for storing and handling data entries. Designed the UI, implemented basic client-side logic, and structured the data flow using XML. Built the entire project with AI guidance to understand end-to-end website creation.

Involvements

Participated in a college-level hackathon.

Certifications
IOT(Internet of things)Wireless and Cloud computing emerging.   – Coursera
